Experimental & Applied Acarology, 10 (1991)
Elsevier Science Publishers B.V., Amsterdam

Author Index

Aarhus, A., *see* Fries, I. et al.
Abdek-Kader, M.M., *see* Rasmy, A.H. et al.
Abdel-Rahman, H.A., *see* Rasmy, A.H. et al.
Abou-Setta, M.M., Childers, C.C., Denmark, H.A. and Browning, H.W.
Comparative morphology and reproductive compatibility between populations of *Euseius mesembrinus* (Acari: Phytoseiidae) from Florida and Texas 213
Arlian, L.G.
House-dust-mite allergens: A review 167
Badii, M.H., McMurtry, J.A. and Johnson, H.G.
Comparative life-history studies on the predaceous mites *Typhlodromus annectens* and *T. porresi* (Acari: Mesostigmata: Phytoseiidae) 129
Barnard, D.R.
Cattle breed alters reproduction in *Amblyomma americanum* (Acari: Ixodidae) 105
Boczek, J., *see* Witalinski, W. et al.
Browning, H.W., *see* Abou-Setta, M.M. et al.
Bukva, V.
Transmission of *Demodex flagellurus* (Acari: Demodicidae) in the house mouse, *Mus musculus*, under laboratory conditions 53
Childers, C.C., *see* Abou-Setta, M.M. et al.
Coons, L.B., *see* Needham, G.R. et al.
Croft, B.A., *see* Dunley, J.E. and Croft, B.A.
see also Messing, R.H. and Croft, B.A.
Denmark, H.A., *see* Abou-Setta, M.M. et al.
Dunley, J.E. and Croft, B.A.
Dispersal between and colonization of apple by *Metaseiulus occidentalis* and *Typhlodromus pyri* (Acarina: Phytoseiidae) 137
Eesa, N.M. and Moursy, L.E.
Temperature/toxicity relationships of some pyrethroids on *Cenopalpus pulcher* (Acari: Acaridae) 77
Fries, I., Aarhus, A., Hansen, H. and Korpela, S.
Comparison of diagnostic methods for detection of low infestation levels of *Varroa jacobsoni* in honey-bee (*Apis mellifera*) colonies 279
Gotoh, T. and Noguchi, O.
Developmental success and reproductive incompatibility among populations of the European red mite, *Panonychus ulmi* (Acari: Tetranychidae) 157
Grafton-Cardwell, E.E., Granett, J. and Normington, S.M.
Influence of dispersal from almonds on the population dynamics and acaricide resistance frequencies of spider mites infesting neighboring cotton 187
Granett, J., *see* Grafton-Cardwell, E.E. et al.
Greenwald, L., *see* Needham, G.R. et al.
Hansen, H., *see* Fries, I. et al.
Ho, T.M.
Phoretic association between *Macrocheles muscaedomesticae* (Acari: Macrochelidae) and flies inhabiting poultry manure in Peninsular Malaysia 61
Hussein, H.E., *see* Rasmy, A.H. et al.
Johnson, H.G., *see* Badii, M.H. et al.

Kaufman, W.R.
Further investigations on the action of ecdysteroids on the salivary glands of the female tick *Amblyomma americanum* 259
Kielkiewicz, M. and van de Vrie, M.
Within-leaf differences in nutritive value and defence mechanism in chrysanthemum to the two-spotted spider mite (*Tetranychus urticae*) 33
Knülle, W.
Genetic and environmental determinants of hypopus duration in the stored-product mite *Lepidoglyphus destructor* 231
Korpela, S., *see* Fries, I. et al.
Kraszpulski, P., *see* Szlendak, E. and Kraszpulski, P.
Long, G.E.
Book Review of *Acarine Biocontrol Agents: An Illustrated Key and Manual* 299
Marshall, V.G.
Book review of *The Soil Mites of the World.3. Oribatid Mites of the Neotropical Region.II.*, by J. Balogh and P. Balogh 297
McMurtry, J.A., *see* Badii, M.H. et al.
Messing, R.H. and Croft, B.A.
Biosystematics of *Amblyseius andersoni* and *A. potentillae* (Acarina: Phytoseiidae): Implications for biological control 267
Moursy, L.E., *see* Eesa, N.M. and Moursy, L.E.
Needham, G.R., Rosell, R., Greenwald, L. and Coons, L.B.
Ultrastructure of type-I salivary-gland acini in four species of ticks and the influence of hydration states on the type-I acini of *Amblyomma americanum* 83
Noguchi, O., *see* Gotoh, T. and Noguchi, O.
Normington, S.M., *see* Grafton-Cardwell, E.E. et al.
Rasmy, A.H., Abdel-Rhaman, H.A., Abdek-Kader, M.M. and Hussein, H.E.
Effects of non-lethal attacks by three phytoseiid species on subsequent development, fecundity and mortality of the two-spotted spider mite 151
Rath, W.
Laboratory culture of the mites *Varroa jacobsoni* and *Tropilaelaps clareae* 289
Rosell, R., *see* Needham, G.R. et al.
Saito, Y.
Life-history and feeding habit of *Typhlodromus bambusae*, a specific predator of *Schizotetranynchus celarius* (Acari: Phytoseiidae: Tetranychidae) 45
Szlendak, E. and Kraszpulski, P.
Energy budget of the grain mite, *Acarus siro* (Acari: Acaridae) 221
Szlendak, E., *see also* Witalinski, W. et al.
Van Heest-Verloop, J.M.
Book review of *European Research on Varroatosis Control* *295*
Van Houten, Y.M. and Veenendaal, R.L.
Effects of photoperiod, temperature, food and relative humidity on the induction of diapause in the predatory mite *Amblyseius potentillae* 111
Van de Vrie, M., *see* Kielkiewicz, M. and van de Vrie, M.
Veenendaal, R.L., *see* Van Houten, Y.M. and Veenendaal, R.L.
Witalinski, W., Szlendak, E. and Boczek, J.
Anatomy and ultrastructure of the reproductive systems of *Acarus siro* (Acari: Acaridae) 1
Wouters, G.
A hybridization model for *Rhipicephalus appendiculatus* and *R. zambeziensis* (Acarina: Ixodidae) using glucose-6-phosphate-isomerase isoenzymes 69

Experimental & Applied Acarology, 10 (1991)
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Acarus
Anatomy and ultrastructure of the reproductive systems 1
Energy budget 221
Almonds
Influence of dispersal on population dynamics and acaricide resistance of spider mites . 187
Amblyomma
Ultrastructure of salivary-gland acini in four ticks and influence of hydration on type-I acini 83
Cattle breed alters reproduction in *Amblyomma* 105
Action of ecdysteroids on salivary glands of females 259
Amblyseius
Effects of photoperiod, temperature, food and relative humidity on diapause 111
Effects of non-lethal attacks by phytoseiid species on the two-spotted spider mite 151
Analytical techniques
A hybridization model for *Rhipicephalus* using glucose-6-phosphate-isomerase isoenzymes 69
Temperature/toxicity relationships of pyrethroids on *Cenopalpus* 77
Comparison of diagnostic methods for detection of *Varroa* in *Apis* colonies 279
Anatomy, *see* Structure and function
Apis
Comparison of diagnostic methods for detection of *Varroa* in *Apis* colonies 279
Laboratory culture of *Varroa* and *Tropilaelaps* 289
Varroatosis control (book review) 295
Apple
Metaseiulus and *Typhlodromus* on apple 137
Argas
Ultrastructure of salivary-gland acini in four ticks and influence of hydration on type-I acini of *Amblyomma* 83
Association, host/pest, *see* Population dynamics
Biological control, *see* Pest management B:
Biosystematics
Biosystematics of *Amblyseius*: implications for biological control 267
Cenopalpus
Temperature/toxicity relationships of pyrethroids on *Cenopalpus* 77
Chrysanthemum
Differences in nutritive value and defence in chrysanthemum to *Tetranychus* 33
Cotton
Influence of dispersal on population dynamics and acaricide resistance of spider mites . 187
Defence mechanisms
Differences in nutritive value and defence in chrysanthemum to *Tetranychus* 33
Demodex
Transmission in the house mouse under laboratory conditions 53

Dermacentor
Ultrastructure of salivary-gland acini in four ticks and influence of hydration on type-I acini of *Amblyomma* 83
Dermatophagoides
House-dust-mite allergens: A review 167
Diagnostic methods, *see* Analytical techniques
Ecdysteroid
Action of ecdysteroids on salivary glands of female *Amblyomma* 259
Energy budget
Energy budget of *Acarus* 221
Environmental conditions, influence of
Effects of photoperiod, temperature, food and relative humidity on diapause in *Amblyseius* 111
Genetic and environmental determinants of hypopus duration in *Lepidoglyphus* 231
Euseius
Comparative morphology and reproductive compatibility between populations 213
Functional response
Effects of non-lethal attacks by phytoseiids species on the two-spotted spider mite 151
Genetics
Genetic and environmental determinants of hypopus duration in *Lepidoglyphus* 231
House-dust mite, *see Dermatophagoides*
Hybridization, modelling, *see* Analytical techniques
Hydration states
Ultrastructure of salivary-gland acini in four ticks and influence of hydration on type-I acini of *Amblyomma* 83
Hypopus, *see* Population dynamics
Laboratory culture
Laboratory culture of *Varroa* and *Tropilaelaps* 289
Life-history studies
Life-history studies on *Typhlodromus* 129
Macrocheles
Phoretic association between *Macrocheles* and flies inhabiting poultry manure 61
Metaseiulus
Metaseiulus and *Typhlodromus* on apple 137
Morphology, *see* Structure and function
Mouse
Transmission of *Demodex* in the house mouse under laboratory conditions 53
Musca
Phoretic association between *Macrocheles* and flies inhabiting poultry manure 61
Oribatids
Neotropical oribatid mites (Book review) 297
Ornithodoros
Ultrastructure of salivary-gland acini in four ticks and influence of hydration on type-I acini of *Amblyomma* 83
Panonychus
Developmental success and reproductive incompatibility among populations 157
Pest management A: Control of acarine pests
Life-history and feeding habit of *Typhlodromus*, a predator of *Schizotetranychus* 45
Temperature/toxicity relationships of pyrethroids on *Cenopalpus* 77
Influence of dispersal on population dynamics and acaricide resistance of spider mites . 187

Pest management B: Acarines as pest control agents
Life-history and feeding habit of *Typhlodromus*, a predator of *Schizotetranychus* 45
Effects of non-lethal attacks by phytoseiids species on the two-spotted spider mite 151
Biosystematics of *Amblyseius*: Implications for biological control 267
Biocontrol of acarine pests (Book review) 299
Pesticides, *see* Pest management A:
Phytoseiulus
Effects of non-lethal attacks by phytoseiids species on the two-spotted spider mite 151
Phytoseius
Effects of non-lethal attacks by phytoseiids species on the two-spotted spider mite 151
Plant host
Differences in nutritive value and defence in chrysanthemum to *Tetranychus* 33
Population dynamics
Transmission of *Demodex* in the house mouse under laboratory conditions 53
Phoretic association between *Macrocheles* and flies inhabiting poultry manure 61
Cattle breed alters reproduction in *Amblyomma* 105
Metaseiulus and *Typhlodromus pyri* on apple 137
Developmental success and reproductive incompatibility among populations of *Panonychus* 157
Influence of dispersal on population dynamics and acaricide resistance of spider mites . 187
Comparative morphology and reproductive compatibility between populations of *Euseius* 213
Genetic and environmental determinants of hypopus duration in *Lepidoglyphus* 231
Reproduction, *see* Population dynamics
Resistance, host
Cattle breed alters reproduction in *Amblyomma* 105
Resistance, target, *see* Pest management A
Rhipicephalus
A hybridization model for *Rhipicephalus* using glucose-6-phosphate-isomerase isoenzymes 69
Schizotetranychus
Life-history and feeding habit of *Typhlodromus*, a predator of *Schizotetranychus* 45
Stored-products, *see Acarus*
see also Lepidoglyphus
Structure and function
Anatomy and ultrastructure of the reproductive systems of *Acarus siro* 1
Ultrastructure of salivary-gland acini in four ticks and influence of hydration on type-I acini of *Amblyomma* 83
Effects of photoperiod, temperature, food and relative humidity on diapause in *Amblyseius* 111
Comparative morphology and reproductive compatibility between populations of *Euseius* 213
Action of ecdysteroids on salivary glands of female *Amblyomma* 259
Tetranychus
Differences in nutritive value and defence in chrysanthemum 33
Effects of non-lethal attacks by phytoseiids species on the two-spotted spider mite 151
Influence of dispersal on population dynamics and acaricide resistance of spider mites . 187
Theileria
A hybridization model for *Rhipicephalus* using glucose-6-phosphate-isomerase isoenzymes 69

Tropilaelaps
Laboratory culture of *Varroa* and *Tropilaelaps* 289
Two-spotted spider mite, *see Tetranychus*
Typhlodromus
Life-history and feeding habit of *Typhlodromus*, a predator of *Schizotetranychus* 45
Life-history studies 129
Metaseiulus and *Typhlodromus* on apple 137
Varroa
Comparison of diagnostic methods for detection in *Apis* colonies 279
Laboratory culture of *Varroa* and *Tropilaelaps* 289
Varroatosis (book review) 295
